National Tuberculosis Center at Harlem Hospital
and the
New York City Department of Health and Mental Hygiene
Bureau of Tuberculosis Control
are pleased to offer a course on

COHORT REVIEW METHODOLOGY: THE PATIENT REVIEW APPROACH

DECEMBER 8-9, 2003

For selected teams of TB controllers, program managers, and epidemiologists—especially from cities, counties or states with a medium or high incidence of TB. On Monday afternoon and all day Tuesday you will learn the theory and practice of the “cohort review” method, originally designed by Karl Styblo, to systematically analyze treatment outcomes of every documented TB case in your jurisdiction. This useful approach serves several purposes: staff motivation, program review, and training needs assessment.

Observe how it is practiced by Bureau of TB Control, New York City Department of Health and Mental Hygiene, and discuss how to modify or apply the method in your own jurisdiction.

By the end of the course you will be able to:

- Describe elements of the cohort review approach
- Organize the details of a complex case into a brief presentation
- Collect data from a cohort review session
- Calculate statistics for various outcomes
- Identify reasons for program failures
- Discuss how this information can be used to improve program performance
- Plan to conduct a cohort review in your own jurisdiction

HOW TO APPLY

Complete the application below and fax or mail it to:

Charles P. Felton National TB Center, 2238 Fifth Avenue, First Floor, New York, NY 10037

Phone: 212-939-8254. Fax: 212-939-8259.

If the course reaches maximum enrollment early, your application will be kept for future courses.

Applicants will be notified in writing of their acceptance into the course.

Please complete this entire form. **Print clearly or type, and do not use abbreviations.** Incomplete applications will delay the application process.
